Screens

#	Screen	Purpose and key elements
S1	Onboarding & Sign in	3 short intro slides (first launch only), then e-mail or Google sign-in / sign-up.
S2	My Groups (home)	List of groups with the user's balance per group; empty state when there is none; bottom navigation.
S3	Create group	Group name, optional emoji/colour, invite members by link or QR code.
S4	Join group	Enter invite code, scan QR or open an invite link; shows group preview before joining.
S5	Group detail	Headline balance, expense list, members, extended FAB "Add expense", link to Balances.
S6	Add expense	Amount, title, paid by, split rule (equal / custom), optional receipt photo, date.
S7	Balances & Settle up	Minimal list of payments (who pays whom), "Settle" button with confirmation dialog.
S8	Activity	Chronological feed of expenses, edits and settlements across all groups.
S9	Profile & Settings	Name, currency, language (TR/EN), theme, notifications, sign out.

Decision points

#	Decision	Outcomes
D1	Signed in?	**No** → S1 (onboarding, sign in). **Yes** → straight to S2.
D2	Has a group?	**No** → empty state offering Create (S3) or Join (S4). **Yes** → S5 group detail.
D3	Split rule?	**Equal** → save immediately. **Custom** → custom split sheet (amounts or %).
D4	Total = amount?	**Yes** → save. **No** → show the remaining difference inline and stay on the sheet.
D5	Open debts?	**Yes** → settle up (record payment, confirm). **No** → "All settled" state.

Edge cases handled in the design

Offline	An expense added without network is stored locally and synced later ("Waiting to sync" chip).
Camera denied	If receipt-photo permission is refused the user can still save the expense without it.
Invalid invite	Expired or wrong code shows an inline error and a "Try again" action.
Cancel	Closing the Add-expense sheet with unsaved input asks for confirmation ("Discard?").
